Commvault Professional Foundations

Course Description

Learn essential skills for configuring and administering Commvault® software to protect data in virtual and physical infrastructures. This 3-day course provides all the information about the Commvault environment core components including:

- CommServe® server configuration
- MediaAgent design
- Agent deployment
- Storage configuration
- Data security

The class is balanced between technical discussions using detailed diagrams and white board sessions, and hands-on labs using an Education Services CVLab environment focusing on the Commvault Command CenterTM.

Prerequisites

It is recommended that you watch the Welcome to Commvault® e-Learning course. This course is included at no additional cost, as a part of the Commvault Professional Foundations registration, and is recommended to be completed prior to attending the course.

Course Duration:

3 days

Certification:

Completion of this course helps you prepare for the Commvault® Professional Foundations Exam Certification. The Commvault Certified Professional V11 2020 is included free of charge as a part of the Commvault® Professional Foundations instructor and virtual instructor-led course registration.

Outline
