

Aruba ClearPass Configuration (AR-ACC)

Course Description

This course provides participants the foundational skills in Network Access Control using the ClearPass product portfolio. This 5-day course includes both instructional modules and labs to teach participants about the major features in the ClearPass portfolio. Participants will learn how to setup ClearPass as an AAA server, and configure the Policy Manager, Guest, OnGuard and Onboard feature sets. In addition, this course covers integration with external Active Directory servers, Monitoring and Reporting, as well as deployment best practices. The student will gain insight into configuring authentication with ClearPass on both wired and wireless networks
